We, ART SHIPBUILDING AND SHIPYARD SERVICES INC., are committed to operating in an environmentally conscious manner. We aim to reduce our carbon footprint, protect natural life, and minimize our environmental impacts for a sustainable future. In this regard, we adopt the following principles:

1. Sustainability and Environmental Management:

- By adhering to sustainability principles, we aim to use and protect natural resources efficiently.
- By identifying our environmental impacts, we establish an effective environmental management system.

2. Carbon Footprint and Emission Control:

- We make continuous efforts to reduce our carbon footprint resulting from our activities.
- We take the necessary measures to control emissions and prevent harm to the environment.

3. Waste Management and Recycling:

- We manage all our waste in compliance with regulations and strive to minimize waste generation. We continuously review our waste management processes to seek improvement opportunities.

4. Energy Efficiency and Water Use:

- We use appropriate technologies to increase energy efficiency and reduce water consumption.

5. Protection of Natural Life and Ecosystems:

- We take the necessary care to protect the habitats of marine life and operate without harming ecosystems.

6. Environmental Education and Awareness:

- We aim to increase environmental awareness by educating our employees on environmental issues.

7. Legal Compliance and Monitoring:

- We take the necessary measures to comply with all environmental regulations and standards, and we ensure our compliance through continuous monitoring.

This policy has been adopted by ART SHIPBUILDING AND SHIPYARD SERVICES INC. and is implemented with the support of all our employees. We are determined to continue working to leave a clean environment for future generations and to minimize our environmental impacts.

SALİH BOSTANCI
